Our Accreditations

Our Services

- **Steel Fabrication & Welding**

We custom fabricate steel parts. Our capabilities include Flame Laser Cutting, Forming, Tube Bending, Welding, Hydraulic Press up to 100 tons, CNC Cutting Machine, CNC Bending Machine, Punching Machine.

Our Welding Shop has various processes to cater to different applications and material, with TPI certified Welders

Tungsten Inert Gas Welding, Metal Inert Gas Welding, Plasma Transferred Arc & Fusion Welding.

- **Product Designing & Development.**

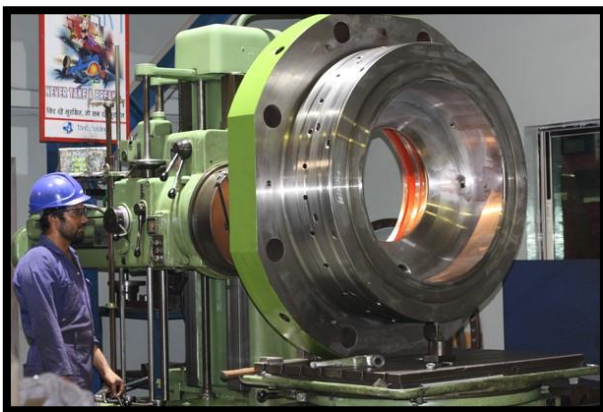

Scan Engineering is a full-service industrial design & mechanical engineering company which develops innovative products for a wide diversity of clients. We create beautiful, distinctive & meaningful products with an eye for sustainability and affordability. We deliver high-quality production ready designs and can assist you with manufacturing, branding & also market introduction.

- **Conventional Machining Works.**

With over 14 years of experience, our Industry Services Division specializes in manufacturing parts to precise specifications using conventional machining capabilities. In addition, we are now concentrating on all Printing Press Machine Maintenances & Services.

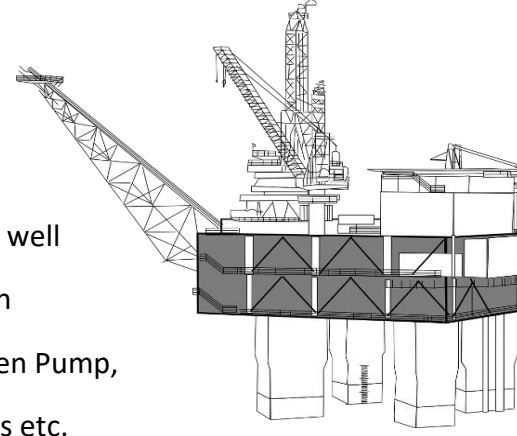

(Turning Lathe, Milling, Drilling, slotting, Horizontal Boring, Surface Grinding, Cylindrical Grinding, Bandsaw).

Our Services

- **Manufacturing of Onshore & Offshore Skids**

The Manufacturing & Testing Facilities of Scan Engineering are well Equipped to undertake the most specialized Fabrication Jobs in Transfer Pump, Air Compressor, Bug Blower, Winch unit, Wilden Pump, Container Reworks (INTERIOR & EXTERIOR), Blow lines Projects etc.

Our Product Range

- Storage Racks,
- Skids for Oil Fields,
- Conveyors,
- Blowers,
- Hopper Feeder,
- Blowlines,
- Heat Plate Exchanger,
- Crossovers,
- Powerpack Modification,
- Wire Drum,
- Container Reworks etc.
